Introducing Driving Aids by Veigel

Freedom. It's an essential part of an active lifestyle. It means setting your own agenda, getting behind the wheel and going where you want to go. We give you that freedom with a range of disabled driving solutions that help you overcome different driving challenges that eliminates and alleviates any discomfort or pain whilst driving.

Why Veigel? For over 100 years Veigel have been designing award winning ergonomic, reliable and easy to use driving aids and controls, making them best in class.

Rigorous testing for your safety	Simple and easy to use	Stylish design	Suitable for most cars, trucks and vans

Hand Controls

Hand controls enable drivers to transfer the operation of gas and brake from foot to hand through various types of motions. Our hand controls can be mounted on both the left and right side of the driver. Our Veigel hand controls are considered the premier brand for reasons of quality, ease of use and appearance in the vehicle.

Left Hand Controls

Available in the following:
Push Rock – Push to brake, rotate handle in a arc motion towards driver to accelerate
Push Right Angle – Push to brake, rotate handle downwards at a 90 degree angle to accelerate
Push Pull – Push to brake, pull to accelerate

The eConnect sets the standard for maximum leg room, safety and style. This electronic hand control is a firm favorite by many.

- 100% electronic acceleration for fatigue free driving
- Available as Push Rock, Push Right Angle or Push Pull
- Button switch activates system for increased safety

eConnect Push Rock

DRIVING

Right Hand Controls

eClassic

The eClassic is the latest design in our Veigel range and is now available with 100% electronic acceleration for effortless and fatigue free operation.

- Low profile brake lock button
- Increased legroom space
- Push to brake and turn handle to accelerate

Compact II

Compact II is a popular push-pull option due to its slim design which fits better in today's newer and more compact vehicles.

- Bigger range of seat positioning
- Push to brake and pull to accelerate
- Can't gas and brake at the same time

Veigel Basic

The Veigel Basic is a lower cost alternative but offers a unique option of being able to customize and change the hand grip system to suit your needs.

- Push to brake and pull back to accelerate
- Sleek synthetic leather cover
- Specific brackets for most popular vehicles

Our range of Driving Aids are designed to give drivers safe and comfortable co

Foot Control and Pedal Guards

Our range of high quality foot controls offer solutions for a variety of reduced lower body mobility issues. Enjoy an easier, safer and more comfortable driving experience.

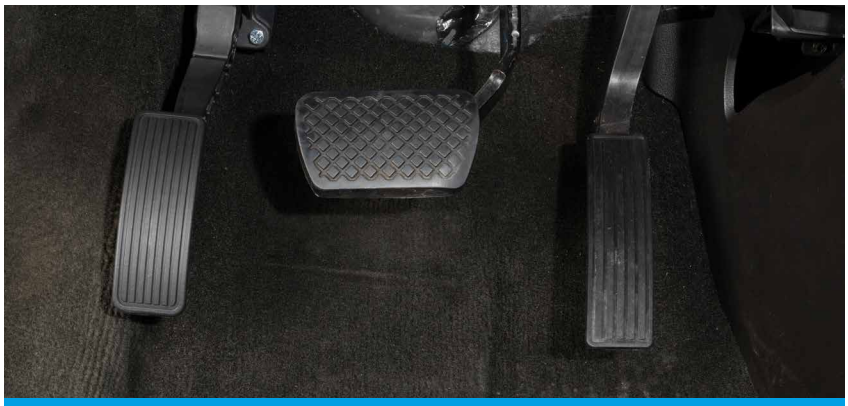
Our **Veigel Pedal Guard** is an important safety adaptation which prevents the foot pedals being pressed accidentally and are often used in conjunction with hand controls to ensure a safe driving experience.

- Easily detachable for conventional driving
- Concave shape provides maximum legroom
- Prevents unintentional use of the pedals

Veigel Accelerator & Brake Guard

The Electronic Left Foot Accelerator allows a driver to operate an accelerator pedal on the left of the brake pedal with their left foot. The design mimics the original pedal for ease of use, comfort and retains full range of acceleration.

- Regular pedal design for ease of use
- Discreet within the vehicle
- Push button to activate left foot operation



Electronic Left Foot Accelerator

Veigel Pedal Extensions are a solution for users whose legs are unable to reach and operate the vehicle pedals. They attach onto the original pedals bringing them closer to the drivers seat, providing a safer and more comfortable driving position.

- Reduce distance to the pedal from 2" to 8"
- Quick release for easy removal
- Can be used in conjunction with our heel shelf

Veigel Pedal Extensions

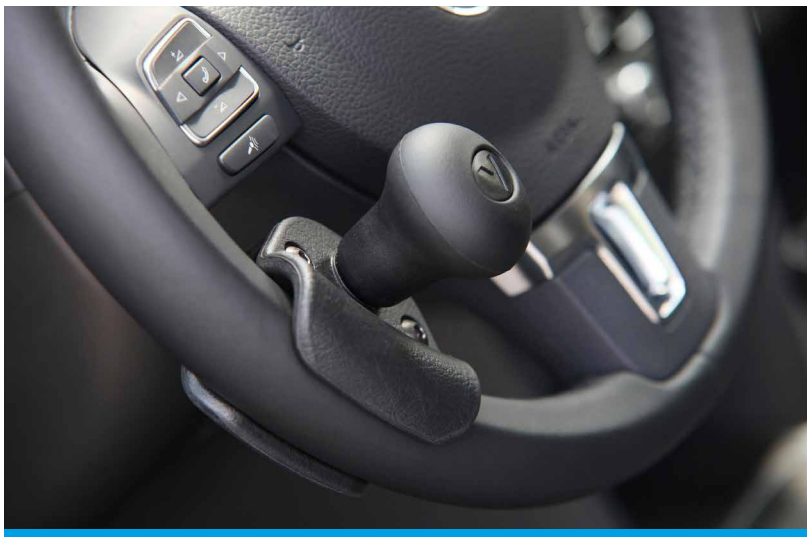
DRIVING

Steering Aids

Steering aids are a very popular adaptation to help assist drivers with limited hand movement or arm strength by reducing the force required to steer. Whilst these can be used independently, it is often essential when hand controls are fitted to a car as it allows the car to be steered with one hand while operating the hand controls with the other.

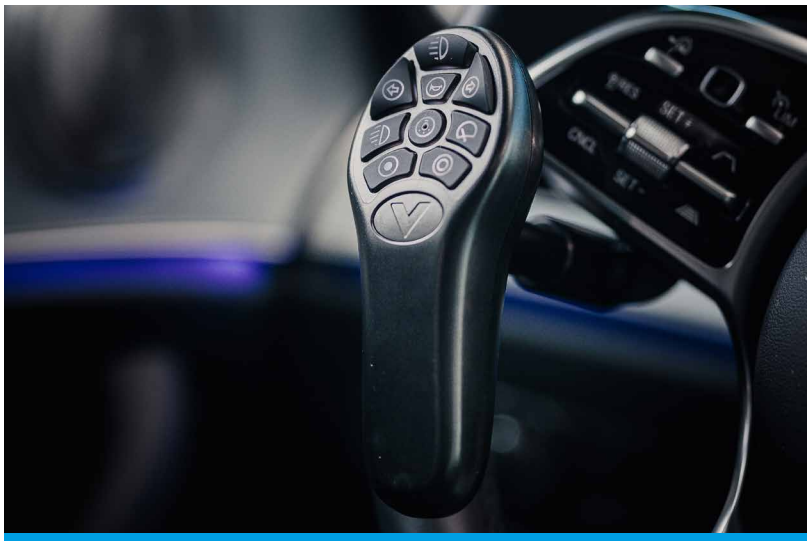
Our Veigel steering aids are designed and engineered to a high specification to provide better grip and support so you can enjoy a safer and more comfortable driving experience.



Veigel Soft Knob Grip

The Veigel Soft Knob Grip is made of soft durable foam, providing more comfort while driving. Designed to stay cooler to the touch in the summer and not as cold in the winter.

- 360 degree rotation for full control
- Quick release for easy removal
- Available in black and gray



MyCommand

The MyCommand by Veigel provides grip for controlling the steering wheel as well as allowing drivers to operate a range of vehicle functions such as the windshield wipers, turn signals, horn, and headlights all from one device.

- Illuminated function keys
- Quick release for easy removal
- Suitable for both right-handed and left-handed drivers

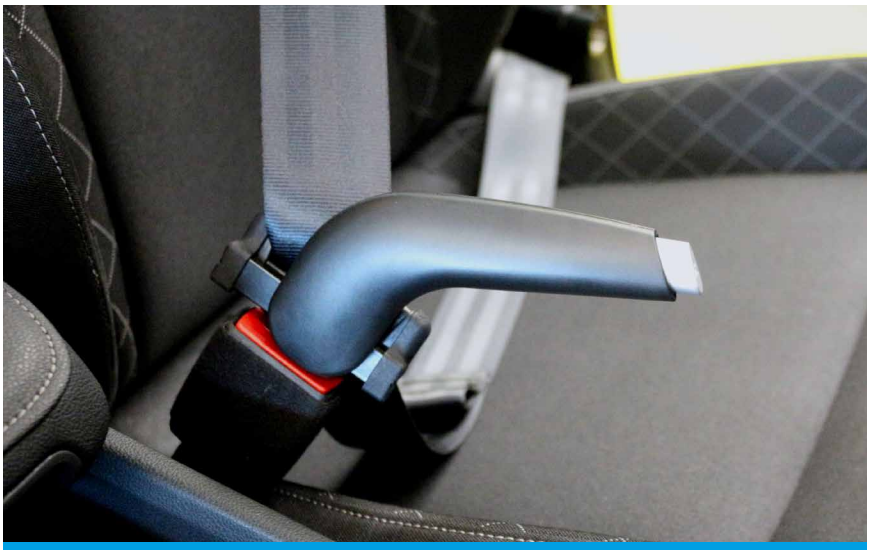
Extension Controls

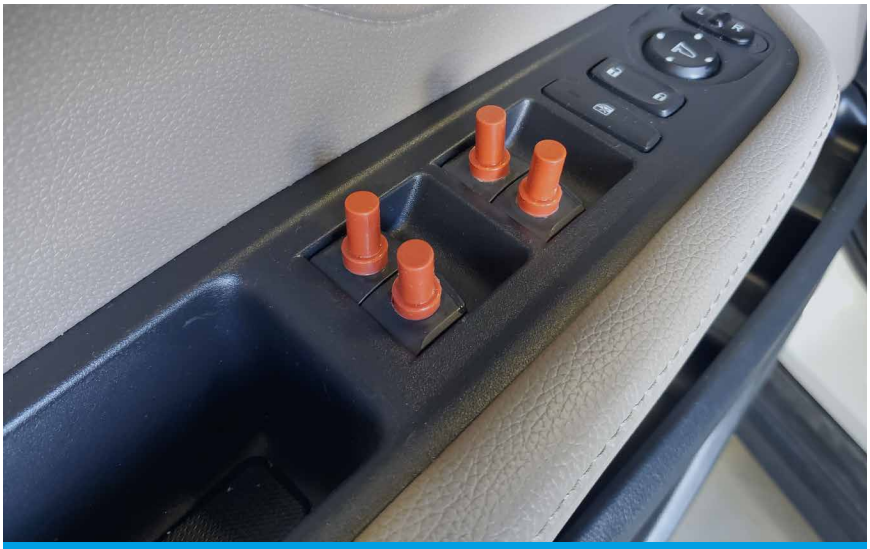
We understand how difficult and uncomfortable it can be for people with reduced mobility or strength to operate certain controls within their vehicle. Our wide range of vehicle extension controls bring your main vehicle controls closer which allows for easier, safer, and more comfortable operation of the controls.



The JIMMY by Veigel

The JIMMY by Veigel is a seat buckle assist device designed to aid drivers with buckling and unbuckling their seat belt buckle in their vehicle. The ergonomic design means it is light weight and easy to use.

- Safety release button prevents unintended disengagement
- Joystick grip gives you more grip and control
- Vehicle specific mounting brackets



Power Window Switch Extensions

The Power Window Switch Extensions offer a non-destructive solution for anyone who needs extra assistance with power switches in their vehicle.

- No drilling required
- Made of hot and cold resistant soft silicone material
- Unique solution

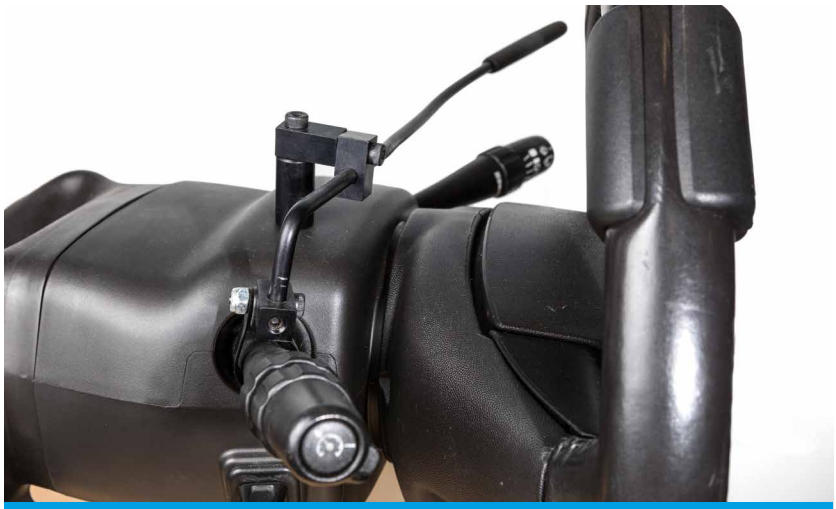
DRIVING

Our Column Mount Multi-Function Turn Signal Lever allows for easier operation of the OEM turn signals by eliminating the need to reach around.

- No risk of accidental activation
- Mounts to trim cover of steering column
- Simple and easy to use



Column Mount Multi-Function Turn Signal Lever

The Veigel Rotary Style Gear Selector allows those with limited hand or finger dexterity to easily take control of the gears with the simple turn of a rotary dial.

- Can be used on either dash or center console
- Ship wheel design for ease of use
- Convenient gear selector
